DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 31, 2003 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on May 6, 2003, July 31, 2003; and August 22, 2003 was considered by the Examiner.

Drawings

3. New corrected drawings are required in this application because Examiner has approved the proposed drawings of Figure 19. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 70-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 70-71 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: it's impossible for one recess to be formed between the projection and two protrusions when the protrusions are located on opposite sides of the projection.

7. Claim 81 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the tapered surface extending from a center of the base is impossible if the protrusion is spaced from the projection.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 55-58 and 63-82 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffmann et al. Patent Number 3,731,445.

Hoffmann '445 teaches all the limitations of the above claims including a connector (see Examiner's Exhibit), a base (A), a projection (B), identical extensions with at least one angled portion obliquely sloped (C, D), protrusions (E, F) with tapered surfaces (G, H), first and second recesses (I, J), and the connector is an elongated track (see Figure 9) with projection, protrusion extending the entire length.

Response to Arguments

10. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis L Dorsey whose telephone number is 703-306-9137. The examiner can normally be reached on Monday-Friday 9:00 am-5:30 pm.
